Work Experiences

Engineer / UX Designer | International Integrated Systems, Inc.

Jun 2021 - Aug 2022. Taipei. Company Website.

- Built and designed the official website of IISI Meteorological Department based on Vue.js.
- Restructured and optimized the responsive design of the Historical Data Purchasing Service site to increase usability.
- Led the major systems redesign of the Civil Aeronautics Administration (CAA), including two projects: Online Operating System and New Forecasting System.
- Integrated and designed multiple information-intensive systems for the Climate Weather Bureau (CWB).
- Collaborated in the product development of a meteorological financial service, translating user requirements into specifications that aligned with their needs and business model.

Web / UI Designer | Surehigh International Technology Group

Sep 2020 - Mar 2021. Taipei. Company Website

- Refactored the e-commerce site with Vue.js to reduce the workload from three days to 10 minutes.
- Designed official sites for hotels with clear brand identification.
- Worked with a full-stack engineer to develop the app "Travel Passport" prototype, a solution binding hotel kiosks and personal data to create brand-new travel experiences.

Marketing Strategist (Intern) | McCann Worldgroup

Feb 2020 - Jul 2020. Taipei. Company Website

- Refined the marketing strategy entry point using GWI/E-ICP for quantitative analysis and Op-view for qualitative research.
